KEYNOTE SPEAKER

Yossi Ghinsberg survived 21 days alone in the Bolivian Amazon with no food, no map, and no certainty of survival. His story became a bestselling book — over one million copies sold — and a Hollywood film starring Daniel Radcliffe. Between 2013 and 2017 he was building AI companies in Silicon Valley, a decade before the world caught up. He speaks to audiences of up to 10,000. C-suite leaders have wept. Teams walk out permanently changed.
